Experience --

SOFTWARE DEVELOPER   **CaseWare International Inc.** | *Jan 2020 – Present*
- Architect & develop a global customer-facing auditing application pilot using React.js, Redux, Node.js, Express.js, PostgreSQL and AWS from the ground-up with a small and newly formed team
- Implement new product features on a bi-weekly basis based on product owner & customer feedback
- Integrate with company's product suite to enable cross-product support for new & current customers
- Transition to full-remote work and co-ordinate with product owners, managers, design and development team to maintain productivity and product development throughput

SOFTWARE DEVELOPER   **Bond Brand Loyalty** | *May 2019 – Dec 2019*
- Implemented & supported new features of Scene's nationwide campaigns including the Rec Room Calgary Stampede & the No Excuses Day which won Best Loyalty Programme Marketing Campaign of the Year 2020
- Deployed Scene's website to QA, staging & production Azure environments
- Developed & maintained features for Scene's front-end, back-end APIs & database infrastructure scripts
- Coded in various languages, tools & libraries such as C# .NET, MySQL, JavaScript, jQuery, Knockout.js, etc.

CAPSTONE FULL-STACK DEVELOPER   **Sheridan College** | *Jan 2019 – Dec 2019*
- Administered a Capstone group & assigned project tasks according based on their knowledge & strengths
- Architected project's web application tech-stack with detailed documentation explaining the tech stack
- Developed & designed majority of the web application's features with React.js, Gatsby.js & Firebase
- Organized weekly team meetings remotely and/or in-person; used Azure DevOps for weekly sprint planning

Skills --

TECHNICAL
- Develop modern JavaScript web applications using React.js, Redux, Node.js, Express & WebSockets
- Experience in architecting client-side & server-side rendered web applications with CRA, Gatsby.js & Next.js
- Work with cloud-service providers such as Heroku, Firebase, Google Cloud, AWS & Azure
- Develop other web applications for personal projects using React Native, Vue.js, Svelte 3, Python & Go

ESSENTIALS
- Lead a team of developers & discuss requirements, complexity & solutions of a project
- Adapt quickly to business requirement changes, accurately scope them & come up with solutions
- Communicate ideas & provide feedback with the entire team
- Learn & implement new technological concepts & solutions efficiently that are required for various projects
- Accepts feedback critically to improve work performance, strategies & skills

Projects ---

ajclemente.ca
- My personal website made with React.js, Gatsby.js, Markdown, Chakra UI & hosted on Firebase
- Sandbox website when trying out new front-end frameworks, libraries & designs
- Write blog posts every month related to technologies I am passionate about

t**emp.chat**
- An anonymous web chat app using React.js, Next.js, Node.js, WebSockets & hosted on Heroku
- Create & join chatrooms anytime; no logs & no history are kept

Slots Tracker
- A casino slots tracker Android app for the using React Native, Firebase & Google Sheets API
- Allows users to track their slot wins, losses, payouts, jackpots & timestamps
- Aggregates collected data & provides analytics to users with in-app charts

Education --

Software Development & Network Engineering   **Sheridan College** | *2016 - 2019*
